

Miyar Karthik Kamath

San Jose, CA | (408)581-3438 | [Portfolio](#) | [LinkedIn](#) | [GitHub](#) | miyarkarthikkamath@gmail.com

Education

M.S. Software Engineering, San Jose State University, CA. GPA: 3.85/4.0 Aug 2023 – May 2025
Relevant Coursework: Cloud Technologies, Enterprise Software Solutions, Machine Learning
B.E. Computer Science, NMAM Institute of Technology, India Aug 2014 – Aug 2018

Technical Skills

Languages: Java, Python, Kotlin, JavaScript, Go

Frameworks & Libraries: Spring Boot, Spring MVC, Hibernate, React.js, Node.js, Flask, FastAPI

APIs & Messaging: REST APIs, gRPC, Protobuf, Apache Kafka

Databases: PostgreSQL, MySQL, MongoDB, Redis

Data Engineering: Spark Structured Streaming, ETL Pipelines, Data Integration, Elasticsearch, ELK Stack

Cloud & DevOps: AWS, Docker, Kubernetes, Containerization, Jenkins, GitHub Actions, Maven, Git, CI/CD Pipelines

AI & Machine Learning: GitHub Copilot, ChatGPT, Scikit-learn, Pandas, NumPy, Matplotlib, Jupyter Notebook

Other Skills & Tools: JUnit, Mockito, Agile, Asynchronous Programming, Microservices, Distributed Systems

Work Experience

Software Engineer, Neuro Leap Corporation, San Jose, CA Oct 2025 - Present

- Developed, tested, and optimized **150+ REST APIs** across **15+ backend modules**, integrating external data sources and sensor payloads with **PostgreSQL**-backed services through data validation and transformation.

Senior Software Engineer, Tech Mahindra (Client - Expedia Group), India Jun 2022 – Aug 2023

- Developed a **Kotlin-based gRPC microservice** for **Lodging Price Summary**, aggregating pricing, inventory, promotional, and availability data from multiple **upstream services** into a unified **core backend platform** supporting **66.97M monthly visits** and **5M daily active users**.
- Migrated multiple Expedia brand services from **REST (HTTP/1.0)** to **gRPC (HTTP/2)**, **reducing latency by 40%**, **increasing throughput by 3x**, and **cutting infrastructure costs by 30%** by consolidating into a single **core backend service**.
- Maintained **95% code coverage** and **99.9% uptime** by validating **Kubernetes-based blue-green** and **canary deployments**, ensuring scalable and reliable backend operations across multiple Expedia brands.

Senior Software Engineer, Infosys Limited (Client - The Allstate Corporation), India Jul 2020 - May 2022

- Expanded and maintained **backend APIs for Allstate Boat products** in the service layer, supporting **thousands of policy creations daily**, performing eligibility validations and calculations to streamline underwriting processes.
- Developed **payment validation features** enforcing a **24-hour cooldown after 3 invalid attempts**, reducing erroneous transactions by **30%**.
- Built **Spring Boot** and **MongoDB** services for centralized project and resource management, improving enterprise reporting, data access efficiency, and cross-team visibility.

Software Engineer, Infosys Limited (Client - The Allstate Corporation), India Jul 2018 - Jun 2020

- Developed **Spring Boot** backend APIs processing **1000s of daily policy eligibility requests**, integrating third-party MVR/LIS systems by **transforming legacy XML payloads into standardized JSON domain models** for downstream policy services, achieving **95%+ code coverage** and **Jenkins-based CI/CD**.
- Collaborated with the **frontend team and product managers**, conducted **UAT testing**, and delivered features across the **SDLC**, improving high-risk policy detection by **20%**, enabling seamless integration with legacy systems.

Software Engineer Intern, Infosys Limited, India Feb 2018 - May 2018

- Developed a **.NET-based** backend web application, implementing business logic for data management.

Projects

Real-Time Log Streaming for Threat Detection | Kafka, Spark, LLMs, Docker, ELK Stack Aug 2024 - May 2025

- Designed and implemented a real-time streaming **ETL pipeline** using **Apache Kafka** for event ingestion, **Spark Structured Streaming** for **data cleansing, feature engineering, transformation**, and **anomaly detection**, and **Logstash, Elasticsearch, and Kibana** for **indexing, visualization, and analytics**, deployed on **AWS** cloud infrastructure with **Kubernetes** for scalability.
- Integrated a custom-trained **Scikit-learn** anomaly detection model with **OpenAI**-powered analysis services, enabling automated threat classification, real-time alerting, and **Docker-based CI/CD deployments**, and reducing deployment time by **30%** on **load-balanced EC2 clusters**.

Travel Diary | Java Spring Boot, AWS EC2, S3, Rekognition, Textract (OCR), RDS, SNS Aug 2023 - Dec 2023

- Developed **cloud-native microservices** integrating **Amazon S3, Rekognition, Textract (OCR), RDS MySQL, SNS, EC2, CloudFront, Elastic Load Balancer, Auto Scaling, and CloudWatch** to build a scalable **AWS-based** image processing platform.
